QuickData

Hits: 1,839

Description: Simply select an html form. QuickData parses the form elements and generates \$_POST code, mysql table creation and insert scripts.

Full version generates jsp,php and asp form data submittal scripts for MySql, Oracle and Microsoft SQL.

Check out arthurbote.com for FormSketcher - wysiwyg html designer - auto generates database, tables and validation rules based on reg expressions.

Freeware with all major functions disabled, Feb 6th, 2005

Reviewed By: wdemmel

Free download version looks interesting but it has all major functions disabled. Save your time if you are not ready to spend the \$49.00 right away to find out if this tool works for you.
