## SQLView (DotNetNuke Module)

Hits: 1,590

**Description:** Features include:

- specify sql query as a select from a table, view or stored procedure - sorting ascending/descending on each column - customizable formatting for the grid, header row, even row and odd row - display an additional header and/or footer comment
- token replacement for PortalId, ModuleId, TabId and UserId, plus QueryString parameters - restriction of any sql text with INSERT, SELECT INTO, DELETE, UPDATE or DROP statement (this option may be disabled with a web.config setting)
- optional OLEDB connection string option if you don't want to query the default portal database
- includes MS SQL and Access Data Provider

### Resource Specifications
