## Thumbnail Popup Scripting Engine

Hits: 2,906

**Description:** Easy to use web interface: just enter the path to your images, along with their dimensions, and the scripting engine writes the code for you for copying and pasting into any page. And you can even test it right from the interface.

Tested: IE6.0; Netscape 7.2; Firefox 0.9.3

- \*Removes IE's image toolbar.
- \*Creates custom, auto-centered popup.
- \*Loads fullsize images from thumbnails.
- \*Auto-focuses popup window once loaded.
- \*Removes default popup page borders.
- \*Displays title-bar loading animation.
- \*Creates hotspot of entire image for closing popup.
- \*Alerts if link is broken/image cannot be found on server.
- \*Accommodates unlimited number of thumbnails & images.
- \*Requires no additional HTML-page authoring for popups.

If you actually use this script, please, take a second to vote for it. And if you have the time, write a review, maybe, make a recommendation of some additional features you'd like to see. Thanks.
