cpDynaLinks - free commercial grade links directory script

Hits: 9,029

Description: cpDynaLinks is based on our very popular cpLinks software. It is a commercial grade script that creates highly search engine friendly link and resource directories using Apache mod_rewrite techniques. The code distribution includes an .htaccess file containing all the mod_rewrite rules required to create dynamic pages that appear to search engines as static pages and directories. There is also a simple to use and intuitive admin control panel to administer this powerful program and all source code is supplied.

Excellent!, May 5th, 2005

Reviewed By: muckraker

This script provides a professional looking links directory without much design work required.

I caution that free support and mods are not provided. If you can't tweak the script yourself you will have to pay a few dollars/pounds/euros.

If you decide to pay for mods, the response in my case was very quick.

It's one of the most friendly directory script. Best of all, it's free, and the support from cplinks webmasters is great.
