## PicoStreamer audio/video live streaming server as CGI Hits: 9,387

**Description:** PicoStreamer is a set of CGI (Perl) and PHP script to set up your own web radio.

It works on a normal web hosting (Linux) and you no need an expensive dedicated server.

Also, due to HTTP protocol used, you can stream data to server behind a NAT/Proxy/Firewall and you listeners can do the same.

It's included Picolcy, a client for streaming to PS server using your preferred Shoutcast/Icecast source encoder.

PicoStreamer is an Open Source project.
