Web rePlay

Hits: 616

Description: Web rePlay is the first web macro recorder for everybody! It works just like a Tivo, you push the record button, start surfing, push the stop button when you're done. No programming needed. Replay the macro with one click. You can even assign an IE toolbar button to your most used macros. It is more than an auto-login application because it records and replays your actions before and after login. Create smart bookmarks!

Resource Specifications

Version:	1.1
