Best gallery script yet!, Dec 15th, 2004

Reviewed By: cprevost

This is the best gallery script I've seen yet. I've tried out quite a few from here. Most were overloaded with features or hard to understand. Some weren't documented well. This script is the easiest to install. Simply upload the files to your server and set 1 permission, that's it! It has a nice interface and lets you choose several gallery styles. The only small improvement I would like to see is a text explanation below some of the buttons describing what they do. This is not a big problem, however since once you click on the button it is fairly evident what they do. This is certainly one of the best scripts I've downloaded from this board. Highly recommend!!!!
