# CodeThatTab

Hits: 6,631

**Description:** CodeThatTab is an advanced JavaScript tab control (page control) that fully mimics look and the functionality of the tab control found in Windows GUI specifications and serves the same purpose. Use CodeThatTab to create a multiple page form within the same window. CodeThatTab displays multiple overlapping pages that hold various content. The user selects a page by clicking the page's tab that appears at the top of the control (or in the other configured position).
