# EMS SQL Query 2005 for PostgreSQL

Hits: 986

**Description:** EMS SQL Query for PostgreSQL is an utility that lets you quickly and simply build SQL queries to PostgreSQL databases. Visual building as well as direct editing of a query text is available. User-friendly graphical interface allows you to connect to databases, select tables and fields for a query, set the selection criteria and many more. You can work with several queries at once, edit queries and view the execution results in several modes and perform any other operations you may need in your work with database queries.

## Resource Specifications

<b>Version:</b>	2.2
