Root Access eZ Publish Hosting

Hits: 1,407

Description: eZ Publish is one of the world's most capable php-based CMS solutions. Unlike other "scripts" you can buy, eZ Publish is a full featured Content Management solution with features and capabilities usually only found in high end commercial CMS products. Featuring built in support for web services like SOAP, XHTML web standards, built in eCommerce capabilities, a powerful publication management system, and easy extensibility to cover your most demanding requirements in one easy to use package. And it's on FireBright's high-end, state-of-the-art Dell 2650 VDS platform at MAE West (one of the top 5 datacenters worldwide). FireBright's includes real root access to your server, unlimited domains and up to 6 installations of eZ Publish per account, and total control via our Enterprise Control Panel, My.FireBright. And, Zend Accelerator included free of charge (an \$800 value!). Or, add it to your hosting business using our private label turn key eZ Publish reseller program.

Resource Specifications
