## A-VS. Simple Virtual Store

Hits: 2,283

**Description:** This is a secure order form processor to be used with SSL protocol. It allows admin to create the html page with the order form, which is linked with the cgi script that is hosted on the secure Web-server with SSL protocol. When some order is made, the script sends to admin. the order confirmation and write the order into the database. Admin. can view or delete the order entries using the SSL secure protocol and the password protection. Very easy to install and configure.

### Resource Specifications

<b>Version:</b>	1.03
<b>Platform(s):</b>	Unix
