My first affiliate program, Feb 1st, 2005

Reviewed By: alentyev

I have tested several programs in the past, however had problems with installation of them. Sending messages to their support forums or emailing them not helps. Then I decided to go with Soft Service and I got following service:

Support.

- 1) Fast (really fast, sometimes just within 2 minutes!) reply to all my emails
- 2) They installed it on my server and linked with osCommerce shopping cart really fast
- 3) They answered to all my email.

So I can say support is really what I needed. Probably other programs works like this but when you can't understand things it drives crazy huh!

Software has a lot of features, track clicks, track sales both one-time and recurring. I used only 1-time sales for my shopping cart products. Integration with design is pretty easy because html pages are stored in templates separated from the PHP code. Integration took me 2 days because I was drawing some graphics but if you have graphics ready I think it will take not more than an hour.

If you want to have great program with great support, just use Affiliate Pro.

Thanks so much to the developers for this great product!

Great script!, Feb 13th, 2006

Reviewed By: sibsoft

I noticed that source code is not encrypted and I can adjust it according to my specific needs, it is really good. Other vendors encode it and thats weird when I can purchase copy of the script, however can't adjust it further when my site has some changes (now or later). PHP written pretty clear and understandable, has multi-language support for database records and templates. I am using PPC search engine and did postback for recurring sales in a background, worked fine. Great work, thank you!

Where are the docs?, Feb 27th, 2006

Reviewed By: mikeuk

There is absolutely no documentation for this package. Not a jot. It has empty .htaccess files strewn around the download so I suppose the assumption is we're all dumbo windoze point and clickers who want to use their "installer". It is far too big to find your way around _and_ do a day's work.

It sucks. I feel robbed.

Great Script, Feb 7th, 2007

Reviewed By: imthe1mike

I'm a newbie, but I was able to install the script quickly, and customize it. I had one small problem with the JP Graph, but they were able to resolve the issue quickly. The support was excellent. I looked at other affiliate software, but this one performed as well in all the demos I tried. Plus you cant beat the price, especially for an entry level or starter affiliate program.
