X-Poll

Hits: 53,027

Description: X-Poll Version 2.0 allows you to create polls with unlimited options which have their own start and expiry dates. You can choose whether to protect your poll with IP and/or Cookie protection. You can even choose how often users can vote on your poll. New with V2.0 is the ability to choose the bars which represent the polls options when the polls results are viewed.

The admin area allows you to Add/Edit/Delete/View polls with ease. New with V2.0 is the IP Blocker. A sophisticated way to block certain users from voting on polls of your choosing by blocking their IP Address. Another new feature is the image uploader. You can now upload images to be used in the results graph for your polls.

Version 2.25 builds upon version 2.0 by adding even more poll options such as preventing the user from seeing results, so polls can be kept private. Also, an archive page has been created so users can look at previous polls.

Fantastic!, Nov 14th, 2004

Reviewed By: phenom39363

This script has absolutely everything that you could need for a poll script. I truly love it. It has just been implemented into one of my clients sites too!

Great script! After spending ages going through polls which had too much of their own logos and graphics, I was pleased to come across xpoll which has simple and easy to configure!

Perfect, just what I need, Jul 17th, 2005

Reviewed By: obsolum

I found X-Poll here while searching for web polls. It was the only free script that had ratings and reviews so I tried it out. It's really easy to install; in less than 2 minutes I had a poll up and running on my local testserver! It is fully customisable to blend in perfectly with your webpages. It's got a nice admin interface that easily lets you manage your polls. And there's also a poll archive that contains every poll you've ever made.

It's just what I need. Good work, X-scripts!

Excilent poll system, Aug 5th, 2005

This is finaly a script that was so clearly eaxplained that even the greatest noob could install it within 5 minutes and there are a lot of possibilities! great script! everybody should use it!

Great ease of use, Jan 20th, 2006

Reviewed By: futurweb

OK I will start with the good points :D

Great ease of use, easy to configure and great to get up and running. BUT .. there is a but.. there is a MAJOR flaw in the coding of the poll system as where the ' character cannot be used in the questions or the options. I have done a quickfix replacing the ' quotes in php with " but it still is a major flaw if the devs want to contact me in order to get the fix please feel free to contact me..

(futurweb.net)

Other than that it's an amazing script

Good for short and sweet minipolls, Jun 6th, 2007

Easy installation

Nice mysql script

Easy to administer

Documentation not too shabby either.

Awesome Script!!, Aug 1st, 2007

Reviewed By: Angelz

Powerful and easy at the same time! I'm not too proficient at PHP, but I had this installed, running smoothly and customized in a matter of minutes. This script definitely rocks big time!!

xpoll, Aug 22nd, 2007

Reviewed By: superdooy

great application - but does anyone know how to increase the number of polls you can set at any one time - (needed for a 12 language site) - mine seems to be set at five. Any help would be much appreciated.

X-poll, a very effective poll tool, Aug 26th, 2007

Reviewed By: jwdj

Searching the entire website for an effective poll-tool has ended. The X-poll software works great, and is, even for PHP beginners like me, not too difficult to embed into our new health website for patients with pulmonary diseases.

Definitely recommended!, Jan 23rd, 2008

Reviewed By: Espy

A breeze to install, easy to manage and easy to customize - even for a not so savvy person like me - thanks to a very clear step-by-step user guide and read-me file. This script is definitely recommended!
