Comdev Contact Form

Hits: 1,171

Description: * Comdev's contact form processor isn't the only choice. But it is a good solution for designers wanting to maintain their creative website layout. Reviewers have mentioned they don't like hacking up their designs to fit other systems. We implemented a small piece of code that designers can paste where they want on the front-end, which pulls in the MySQL/PHP contact form. * We had to make it real simple on the back-end too. Nobody wishes to mess with complicated configuration files & phpMyAdmin, so we developed an Installation Wizard that gets the admin area up and going. * If you would like, you're welcome to install and try our complete system for FREE. Also, if there's time you'll find features/benefits, a live demo and customer site examples at our website.

Resource Specifications	
Version:	3.0
Platform(s):	linux, windows
