RepairShop2

Hits: 2,009

Description: RepairShop is a brand new way to manage your repair service department. From repair arrival to departure, it will help you to keep work, customers and bids organized. It will file your customers, build repair forms, generate work orders, hold jobs lists, remind you when jobs are waiting for too long or if items has been forgot. RepairShop will collaborate with your customers, telling them when there are updates to their job entry, and it will let them approve or refuse your bids - ONLINE.

After nearly two weeks of paying for the software, I finally received a copy to discover that

1. The software only supports US currency
2. Support for this software is none existant
3. The company RealityMedia is just a con
4. Short and sharp replies from technical when they bother replying!

Overall, the worse decision I ever made buying software from this company. The company is verging on illegal. The software has stopped working on my server now after 2 weeks! It's complete crap!
