# Magnolia Content Management

Hits: 2,830

**Description:** The Magnolia 2.0 CMS combines an outstanding GUI, great usability, web-based deployment and J2EE enterprise strength. It is the first open source CMS using JSR-170, the "Java Content Repository API". It has an easy to use WebBrowser Interface, a clear API and a useful custom tag library for easy templating in JSP and Servlets.

All actions can be performed directly in the web-browser using the right mouse button. Content elements can be moved and sorted using drag & drop. Thus the use of the system is simplified and faster, and required user training and resulting costs are minimized.

Resource Specifications	
<b>Version:</b>	2.0
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Nov 26th, 2004
<b>Last Updated:</b>	Nov 27th, 2004
