# SayBox - Free Remotely Hosted Shoutboxes

Hits: 711

**Description:** Saybox offers free remotely hosted shoutboxes to use on your website. Each Saybox can be customized to match the colors and style of your website, and because we host them, there's no tricky installation to do - just signup and insert one line of code into your page to get started!

We give full technical support to users, or potential users, of SayBox both before and after you signup if need be. Technical Support is also completely free.

I must say, I'm very happy with the service SayBox provides. They have a lot of features that other services do not and now soon, the new version of SayBox is coming out, with even more features.

It comes full with an admin panel, where you can set everything from colours, to size, to censored words, bans and a lot more and all of that in one place.

Also their support forum offers very good support and is a great community to just "hang out".

Version 3 of SayBox is like no other shout box I've seen or used. Most of the features you would expect to pay for, but no! Saybox is completely free! I highly suggest it!

SayBox is the BEST remotely hosted shoutbox available on the 'Net! I tried other shoutboxes before but they always lacked some features SayBox had. When SayBox first opened, I got one and was thrilled with it! BEST features of any shoutbox! SayBox leaves all others in the dust!

Wow, I really think that the staff over at Saybox does an amazing job with everything. Customer support is incredibly fast, the system admin panel is easy as ever to use, and I would suggest this to anybody looking for an edition to make their site a better place to be.

The staff over at saybox should be proud of the job they do. They are friendly, and know how to do business and do it right. I would recommend no other chat system! Saybox is by far the only chat service to use that is worth your time. I have used it and never had a single problem with it. Rock on Saybox! Hope you never go away!
