BlogHoster (Blog Hosting System by Splashpress)

Hits: 31,460

Description: Create your own weblog hosting service! With BlogHoster, your users can create and maintain their own weblogs with basic or custom templates, comments, user profiles, friend lists, avatars, various privacy settings, and more. Your users will be able to write entries with a web-based rich text editor and manage entries with an easy to use control panel. BlogHoster is very easy to integrate into your existing website. BlogHoster only requires that you have PHP and MySQL on your server - there is no flatfile data. BlogHoster also gives you, the admin, the capability to place ads on your users' weblogs. This product is perfect for web hosting companies or community-focused websites..

I am thrilled with this product!, Aug 1st, 2005

Reviewed By: rumble

This product works great out of the box! After installing, testing moving into production this system has stood up to anything I and my members have thrown at it so far. At present, I am running over 1,200 members and we are growing at about 200 per week. Great job! The support team rocks!

If you want to host blogs on your site or on your server, you will not find a better script. BH is easy to install and easy to configure. Support is mostly through their friendly and very active forums, by staff and other users. I'm glad I found BH and I wouldn't use anything else, free or otherwise. Highly Recommended!
