Netquery

Hits: 8,468

Description: The Netquery PHP/SQL toolkit of network utilities includes the following features:

- ~ access monitoring & log management,
- ~ spambot "bad behavior" screening,
- ~ geolP & top countries usage mapping
- ~ multidomain & IP/AS whois lookups,
- ~ autodiscovery for whois TLD server,
- ~ DNS and Dig (ANY, SOA, MX, NS) queries,
- ~ email address format & MX validation,
- ~ port check with services lookup option,
- ~ HTTP HEAD and GET requests,
- ~ ICMP pings (local and/or remote),
- ~ traceroutes (local and/or remote),
- ~ looking glass router interrogation,
- ~ updatable GeolP & ports data paks,
- ~ user inputs with admin notice & approval,
- ~ multi-instance sideblocks in CMS editions,
- ~ admin selectable CSS stylesheet options,
- ~ full W3C XHTML 1.1 & CSS compliance.

Version 4.13 updates Netquery's access monitor to Maxmind GeolP August 2008 and Bad Behavior v2.0.22. Netquery editions available for standalone use and as CMS modules for e107, PHP-Fusion, Xaraya, Xoops and Zikula.
