## UBB CMS toolkit

Hits: 761

**Description:** UBB code is a replacement for HTML so that inexperienced users can format what they submit.

This code is ideal for anyone writing a Content Management System or Comments etc...

Includes:

PHP functions for doing and undoing UBB code to text

a PHP word filter function

Javascript form. Users simply highlight text and click a button, and it adds the UBB code to the form.

**Works only for IE**, Dec 16th, 2004

Reviewed By: Czaries

It is a useful tool that works good, but it works only in IE browsers, and will not work at all in Mozilla Firefox or Opera.
