This is a great portal! Out of all the portals out there, this one has the most flexibility. Pure ASP and MSSQL integration at it's best! I fully recommend this suite for anyone who want a no hassle ASP portal and forum!

**iPortalX is the best ASP Portal!**, Mar 10th, 2006

Before using iPortalX I have tried a large number of other portal software. I must have spent days unuploading different portals and forums. But I have finally settled on iPortalX. This is a clean, quick and VERY easy to use ASP Portal. You can choose weather you want the portal to run off MS Access or MSSQL. Setting up is very straight forward you just point your browser to the setup file and you portal is ready to use in seconds.

A high level of support is also given for iPortalX.
