## phpNet's User Registration (db)

Hits: 1,350

**Description:** So you want to have the option to let users register on your website and have their information stored in a database? Well, you've come to the right place! We will explain in detail how to create a user registration and login script from the ground up.

Since we will be using a database to store the information about our users, we will need to create a table in the database....

### Resource Specifications

<b>Version:</b>	1
<b>Platform(s):</b>	linux, windows
<b>Date Added:</b>	Dec 18th, 2004
<b>Last Updated:</b>	Dec 20th, 2004
<b>Author:</b>	Dude

**Average Visitor Rating:**  **3.86** (out of 5)

Number of Ratings: 7 Votes

**Average Member Rating:**  **0.00** (out of 5)

Number of Reviews: 0 Reviews
