EasyNews

Hits: 5,591

Description: EasyNews System is an extension of EasyDynamicPages portal system including dynamical creation and managing of RSS news. Displays RSS content as feedreader, parses RSS files and shows content formatted supporting all versions of RSS (0.9, 0.9x, 1.0 and 2.0). Configuration variables, OPML files and RSS links are stored in MySql database while the news are cached. Plugins included with the install are BookMarks manager, E-Calendar, E-Publish, E-card, E-gallery, E-Classifier systems and EzFeeder as a free (GPL) stand alone application.

EasyNews could be a Web Portal System, news system, personal or business site.

You do not need knowledge of html, php to develop the website. Each user can submit news, comments, calendar events and more. Registered users and administrators can additionally create and modify DynamicPages.

Features: design/content separation, web admin, user-customizable theme management, SiteConfig manager, PageEdit manager, Search engine, Left/Right blocks system, editor to add news and for content management, modular DynamicPages structure, system self-install and more.
