A very small yet very good script, Feb 28th, 2006

Reviewed By: onyxmonster

I bought this script about a month ago, and find it very good. The script is very small compared with other similar scripts (only 300KB!) but the feature is abundant, from sponsored link to wysiwyg editor, really cool! The support is great too, they always reply my email. I'm a beginner in PHP, but they are very patient to guide me. Good work!

Just what I was looking for..., Nov 10th, 2006

I tried about every free link indexing script I could find and they all seem to have some major issues, bugs or just not complete. Directory97pro worked right from the start - easy to install, easy to manage, easy to template and most importantly, truly search engine friendly. Thanks c97!
