Needs more user options, Jun 15th, 2007

Reviewed By: David P

Needs two sides, User and Admin. User shouldn't be allowed the option to Delete or Overwrite images. As owner I should be able to not display Filesize, Last Updated and Delete cells in the main table that list images. I was unable to change the default folder where images are uploaded to and have them display. All images have to be uploaded into same directory as the script or it doesn't work. I'm giving a rating of 1 for lack of owner control over the look and unable to change image folder.
