# CF Time Span Calculation

Hits: 1,131

**Description:** REQUIRES Cold Fusion 5.0 or MX to run- Uses "CreateTimeSpan" to translate both start time and time span into minutes. That way only a simple addition is required to determine end time.-"TimeFormat" is then used to return the start time and end time back to a HH:MM based time format.-Several of the "TimeFormat" formatting options are provided with this script.

## Resource Specifications

<b>Version:</b>	1.0
