LOKI-PMS Property Management Software

Hits: 1,352

Description: LOKI-PMS™ is an Internet reservation and property management system that will improve the way you run your business.

By combining the elements of traditional property management software [PMS] with the latest Internet technology, LOKI-PMS™ opens the doors to a secure, easy-to-use and affordable property management & reservation system for all property types.

In addition to standard PMS features such as customer management, integrated accounting and administrative reporting, LOKI-PMS™ offers various powerful enhancements only Internet property management software can offer.

And because the whole system is accessed using a Web browser such as Internet Explorer, software installations and upgrades are never required. All you need is a computer and a connection to the Internet.
