Downloader

Hits: 788

Description: Downloader is a simple tracking script designed to track the amount of .zip and .pdf files being downloaded from your website. Use downloader to keep a constant track on your files. Downloader will sort your files and produce a graph based on the amount of times each file has been downloaded. Features Include:

Easy to set up and install. One script tracks multiple files. Hides your downloadable script url's from your visitors. Easily add and delete counters for new files online. Customisable header and footer files to reflect the look and feel of your own website. Produces a graph based on the amount of downloads for each file. Supports individual links to downloadable files. Link to [downloader.cgi](#) to list all available downloads.

Resource Specifications
