When i first clicked i tought it would just be a normal blog hosting service or less but i was surprised to see all the features

- nice layout / (future) chose layout
- Free file uploading (20 megs)
- emoticons
- comment feature
- free support forums
- ability to make private blog
- friendly urls (no stupid dynamic link)
- first 100 ppl to ask on forums get a free subdomain

and this all free this is really amazing!
