## RSS\_GET Headlines

Hits: 4,081

**Description:** This is a quick and painless way to include RSS/XML/RDF headlines on your webpage. All you have to do is set 3 variables (URL/Name/Number of headlines) and include the file.

The script stores the headlines in files and only loads the RSS file every 15 minutes (time customizable).

The script may be included many times in the same page, making it great for making a web portal or home page.

### Resource Specifications

<b>Version:</b>	1.47
<b>Platform(s):</b>	linux, windows, freebsd
<b>Date Added:</b>	Jan 13th, 2005
