**Description:** A content managed, link management script / application, written in asp.net vb and made to work with Microsoft SQL Server.

**Average Visitor Rating:**  2.50 (out of 5)

Number of Ratings: 2 Votes

This script / application not only categorises your links, but it also counts the links in each category and shows you the total in brackets after the category name. If a category has no links in it, then it's not shown.

**Average Member Rating:**  0.00 (out of 5)

Number of Reviews: 0 Reviews

You have full control over your links via your internet browser, no more html editing and frustration to make simple changes

## Other Links by This Member

An admin [Control Panel](#) is included, of which the features are:-

- Add link categories
