Top List Service

Hits: 1,799

Description: Create your own top-list replicator with this feature-packed script. Provides an unlimited number of lists and sites, automatic e-mailing to list and site owners for varying events. List visitors can optionally review and rank sites (from 1 to 10). All html is generated based on templates providing for complete control of the site's design. Script allows you to have both free and paid members-- allowing paid accounts more options, such as their own sponsor banners in the list, etc.

Uses the MySql database for bullet-proof efficiency, and other countless bells and whistles to make this a must have script for generating that valued traffic. List owners can fully edit all member sites including title, url, e-mail, password, total hits, clear ip-based hits, among other fields. Sponsors can be added and will automatically appear in the break between sites.

High-tech anti-cheating technology embedded and, in addition, verification can be enabled so that new sites have to be reviewed by list owners before they are visible on the list.

The layout of the list is extremely configurable with the ability to set how many sites there should be listed before there is a break, how many sites should have banners and descriptions, how many sites in total should be listed, showing sites without hits on or off, and separation of the highest ranked site so that it can be decorated differently than the rest of the list.

Resource Specifications
