Email Cash

Hits: 1,930

Description: Email marketing remains among the most profitable methods of advertising in today's world (why do you think your mail box is filled with ads?) However, in order to maximize your return on investment you must have the highest quality address lists to send your promotions to. EmailCash is an industrial-strength solution for owning and operating a program that pays webmasters to bring you quality, optin email addresses from their visitor pools. What this script does is allow webmasters to signup as affiliates of your program and place the code for your program on their pages. This small snippet of code allows surfers to enter their email addresses to join your mailing list. Each time a surfer enters their email, the referring webmaster gets paid a set amount. Example: 5 cents per email address. EmailCash has many hidden features such as duplicate address checks and detailed reports to help in catching cheaters. It also gives each affiliate a complete status report on request, automatically, and in real time. The script can be set to redirect surfers to a "thank you" page and then to the original page they were at so your affiliates never lose a single bit of their traffic. This type of program has been highly successful to many webmasters out there, but until now was only possible for large sites and major corporations. Now you can also share in the profits from this highly advanced method of gathering high-quality, targeted optin email addresses. The script has a ton of error checking and also cheater protection as well as duplicate address checking.
