I have had to deal with the source code full of crypto code to the point that for no reason 45-days after buying it. It now does work. When you go to the Admin Section; <http://www.compulink-net.com/CompuLIFE/admin/> it tells me that there is an error in the crypto code. I have email them with no reply two-weeks ago. Fine product but I wish I had not wasted my money and just wrote it myself.
