squash ladder PHP

Hits: 4,264

Description: An open source browser based sports ladder. Squash ladder PHP was developed as a web application to automate the running of a squash ladder. As an open source package it is under continual development and can be downloaded for installation on your own server. Alternatively, you can have your ladder hosted for free at squash-ladder.net or sports-ladder.net. The package can be set up to run a single ladder or alternatively to run multiple ladders. Whether installed locally or hosted, each ladder is fully customisable to suit your individual needs. Features include: password protected login, variable challenge period and places, automated reminders emailed out for expiring challenges and automated forfeiting and many other settings. The ladder is suitable for sports such as squash, tennis , badminton, table tennis etc.

Resource Specifications
