Inspire Web Survey Application – Free Hits: 13,001

Description: Simple web survey is a php & mysql web based survey application that can be used to collect quantitative and qualitative information from anyone via email or unique url. The surveys are fully customizable meaning you can determine the questions that are asked, all without any need for knowledge of scripting languages. The survey software will prepare reports for you based on the results of the surveys taken. Installation is very easy as we provided a graphical user interface for installing the software so you don't have to execute any mysql scripts.
