## Word Web-stream

Hits: 1,045

**Description:** This win-cgi script allow to read/open the any MS Word documents on server side and return the html-converted contents (to client browser).

The script don't use any external libraries (no MS Excel/Office, no ADO etc) and you may run this tool on computer without any additional setup/install. Very fast and don't eat a lot of server resources.

All MS Word documents supported with automatical unicode conversion (including far-east languages).

Only MS Windows platform for web-server supported
