# MySQLpoll

Hits: 3,818

**Description:** A simple poll like you see it on most of the sites. This polls layout is completely dynamic trough a CSS stylesheet. I've also scripted a little admin tool for it. The poll is easely implemented in your page or site. Just use the demo index.php and copy paste some code into it, or the othe way around... I still havn't the time to make a MySQL table installer. So you'll have to know how to add the MySQL tables to your database, before you can use my code. (It should be easy for you when you use phpMyAdmin for adding and editing MySQL databases and tables)

## Resource Specifications

<b>Version:</b>	0.0.3
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Feb 18th, 2005
<b>Last Updated:</b>	Dec 28th, 2006
<b>Author:</b>	Daantje.nl
