Looks good...but, a major flaw is the inability to collect payment from advertisers and run payment like credits.

Clean solution at a reasonable price., Apr 1st, 2008

Have to agree with this comment <<a major flaw is the inability to collect payment from advertisers and run payment like credits.>> but comparable to other products, it is a better looking solution and for the difference in price you can easily add what it lacks on your own and still come out ahead. I rated it a 3, because of the Absolute Forced Branding, but do really like the product. Easy to install, Clean and Professional UI. Works well on Virtual Servers.
