# NeoLoad

Hits: 1,680

**Description:** Load Testing Tool for Web Applications. When high-end products are too expensive, when cheap and open source products are too limited, use the best middle-range tool: NeoLoad. Very easy to use (no scripting) but can design advanced scenarios to handle real world applications. Answers to these questions: how many users does my site handle? Will my site crash under load? What are the response times? Download it now! Make your first test in 10 mn.

Key features:

- Browser based recorder: Simply browse your application to record your scenario
- System Monitoring: Get statistics from your servers (CPU, Memory, ...)
- Data replacement: Log in the virtual users with different accounts, submit forms changing the values
- Data extraction: Extract generated links and forms
- Content validation: Check page content under load
- Reporting: Generate a test report (HTML/PDF/XML)
- SSL: Record and replay secured pages.
- IP Spoofing: Mandatory to test IP based load balancers

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, sun
