This has got to be one of the best stock quote scripts I've seen anywhere! Would like to see more layouts or some customizing features, but this is by far the best on the net for the price. Would highly recommend to anyone wanting to display investments on their sites.

It was easy to set up and conform to my existing site. My clients have made numerous comments about how professional it appears on all platforms.

Their customer service was above and beyond what was expected. That was priceless to me! I don't know much about php, but I knew I had it on my server, so he set it up for next to nothing. Happy to give a positive review.
