Well, I think it's the best poll solution for now for this price. It is very simple to use and have all needed functions. Although it has no complex features, but it is very user-friendly and handy.

I tried a lot of different poll scripts to use and I was really tired to install free poll scripts and found them not very user-friendly or limited in functionality.

At the other hand, I had no problem installing DreamPoll and support is really great.

Highly recommended to all webmasters.
