The SmartPPC team are great, customer service is superb, and their ppc search engine is very high class!

Big on Features (perhaps) but a pity about the service, Jun 20th, 2005

A competitively priced script that *appears* to offer more than most PPC scripts for the price. However, being totally encrypted means that less savvy developers (such as I) at the total mercy of the vendors - who offer a "customer experience" with much to be desired. Even very minor requests for basic assistance mean \$\$\$!

Great Script BUT! Pay for support, Oct 20th, 2005

This is one of the BEST scripts that i have come across But this company makes you pay for support which is their only downfall

This is one of the best PPC scripts But way over priced and their support is hopeless because they make you pay for help/support/fixes and everything under the sun, if they offered free support and fixes etc since your paying so much for the script and plugins it would be great but until they do it i would suggest to stay away from them otherwise you'll be handing over alot of cash for support/help and even little questions will cost you.

A cost effective solution?, Mar 15th, 2006

Great script, lots of features, very heavy price. On top of that you have to pay for support and bug fix updates.

Very powerful to use. Support is great, they are 12 hours ahead so I am happy. As with any product or service you get what you pay for, I purchased the pro version with portal and I could not be happier. Great job
