I have searched high and low for a multi-user calendar that has good reporting functionality and was inexpensive. The company offers a standalone IT based solution that runs from \$5K up BUT it's web hosted version is \$50 per month for unlimited user.

Unbelievable deal as a hosted solution. Since Software as a Service makes sense for my company (we are scattered around the world) that eStudio 6 was what we went with. I love it!

I am sure that their perpetual license is great!
