phpSHOUT Version 3

Hits: 8,861

Description: A simply shoutbox based on a flat file database. phpSHOUT now comes with a admin section to easily manage your posts. Edit and delete user posts and even ban ip address.

Along with the admin section phpSHOUT has many cool features. Smilies, Two toned background posts, bad language filter, pagination archive, word wrapping, flood control to prevent spammers and many more. All features can be switched on or off and are fully customisable. Very quick and easy to install.

The great thing about phpSHOUT is that it's based on a flat file database and there is no programming involved in setting up a database. Also the best part is its completely FREE!
