## SmartPPC Pro Dynamic Portal Plug-In

Hits: 756

**Description:** This plug-in allows to create a set of categories, and relate any number of search phrases for each of these categories. All phrases entered should be related to the topic of a category, and more phrases were added, the more diverse page content would be. After Dynamic Portals plug-in was configured, one can see a page with dynamic categories, and each category will contain random set of search phrases. With each load of a page, information is changed, which makes it dynamical. When one of search phrases is clicked, user will be redirected to the search page, where the search phrase will be used as a keyword. It is a brand new feature in the world of search portals.

### Resource Specifications

<b>Platform(s):</b>	linux, windows, freebsd, sun
