# QnECMS: Quick and Easy Content Management System

Hits: 1,655

**Description:** QnECMS is a full featured, accessible Content Management System. Easy to use and suitable for small business, individuals, colleges or anyone who needs a powerful but easy to use CMS. QnECMS is built with accessibility from the ground-up, making it the most standards compliant and accessible CMS on the market. QnECMS is the CMS used by the Guild of Accessible Web Designers website.

With the QnECMS there is no separate administration area - just 'one-click' editing on every page. Once you have logged in - just scroll down to the bottom of any page and you will see the administration menu.

Increase your revenue by rebranding this CMS it and selling it as your own.

Testimonials: "The new WYSIWYG feature allows anyone (even my technophobic wife) to add and edit new pages and content - I love it and recommend it to all my clients." Mick Wood, mickwood.com, "I think it's great! Easy to learn and fast." Pat Gallagher, ScotConnect.

QnE is one of the very few CMS that produces valid, accessible, markup and yet doesn't demand that site authors have technical skills. PHPMarkdown is available within the system so that novice users can create and edit pages using plain text whilst experienced developers can add XHTML markup to add formatting and individualised layouts.

The setup is pretty simple. You have a basic site up and running within an hour. Completely re-templating the site takes only a few hours more - although this does demand some XHTML and CSS skills. The system allows for multiple site authors/members (tested with 300 authors/members) using a 'privileges' hierarchy of at least 3 levels. RSS feed is available by default as is the ability to email all site authors/members at once.

A very useful tool not only for community based, multi-author, sites but also for busy webmasters who don't have the time to hand code every page but want to maintain markup standards across large and/or busy sites.
