Voting control for ASP.NET written in C# Hits: 3,650 (CSharp)

Description: Features • Control written in pure "managed" C# (CSharp.NET) • Not require SQL or any other database (Only file copy) • Cookie security addins to prevent double submissions • Completely driven from an xml file to control Questions/Answers • Fully localizable (English, German, ...) • Dynamic results in real time • Gives you full control over all colors, fonts, styles, etc. • Run several different polls at once throughout your site • Ready to use in few minutes

Requirements, Installation and Management

- Copy & paste deployment of few files
- Microsoft Windows 2000/2003/XP Pro
- .NET Framework v1.1
- Free option: Microsoft SQL Server 2000 or MSDE (includes SQL script)

Resource Specifications
