## Shuttle MenuBar Style 02

Hits: 896

**Description:** Shuttle MenuBar Style 02 is similar to its sibling component the Shuttle MenuBar Style 01. Unlike its sibling this component's shuttle moves to underscores the mouse over selection instead of highlighting it. The component uses ActionScript v2. It is easy to use and customize through the Component Inspector. Customizable features include:

- \* The number of buttons
- \* Button labels
- \* Button URLs
- \* The link target
- \* The caption label
- \* All font styles and colors
- \* The color of each GUI element
- \* The shuttle tween speed and ease type
- \* Sound FXs can be toggled on or off.

Use the Flash Extension Manager to install the component .mxp file. After restarting Flash MX 2004, the component can be accessed from the Components panel under MJetPax Components. Use the Component Inspector panel or ActionScript to customize.

All supporting information can be found in the Flash Help Panel>>Using MJetPax Extensions>>Using the Shuttle MenuBar Component.
