# My Poll

Hits: 18,121

**Description:** My Poll aims to provide an easy to use add in solution for adding voting interaction on webpages. The package includes both a CGI script and an SSI for embedding into .shtml pages. Both interfaces use the same config file and can be used exclusively or in combination. A question and list of answers is entered in the config file. The included CGI script can be accessed directly to present the user with the question and list of options. After making a selection, a pretty bar graph is displayed with the results. The included SSI script can be used to embed the question and answers in a smaller table within a webpage. Clicking on one of the options in the SSI page shows the results in a new popup window. The script has optional time based IP logging to prevent multiple votes from the same IP address within a specified window.

## Resource Specifications

<b>Version:</b>	2.1
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Price:</b>	Free
<b>Date Added:</b>	Apr 7th, 2000
<b>Last Updated:</b>	Aug 3rd, 2007
<b>Author:</b>	Erin Spice
